Colby College - Oak Human Rights Fellowship 2024-2025

 Saiba mais	<p>Resumo: The Oak Institute's 2024-2025 theme is Environment and Living Rights. Protecting life inextricably binds human, animal, plant, water, and land lives together within fragile ecosystems. While human-centered environmental activism insists that we all depend upon, and should have the right to, a safe, clean, healthy, and sustainable environment—we might further ask: what rights do waterways hold? What of mountains? The animals on whom the human species depend for labor, sustenance, and companionship? It is undeniable that the settler and capitalistic structures that have become increasingly global are causing harm: from warming waters and melting glaciers to the increasing frequency of catastrophic climate events, all life forms are suffering. For instance, the International Organization for Migration (IOM) predicts that by 2050 the catastrophic effects of the climate crisis will internally and externally displace millions of living beings. The living rights implications of climate change are staggering.</p>

A-T Children's Project - Research Grant Program

Saiba mais

Resumo:

The Research Grant Program supports promising research with sound scientific rationale. No idea is too novel for us to consider, as long as it has clear relevance for people with ataxia telangiectasia (A-T) and the potential to lead to a therapy. We welcome applications from academia and industry scientists, small biotechnology and large pharmaceutical companies, and even from venture capital firms that are incubating new technologies which may hold promise for A-T. Our portfolio spans basic, translational and clinical research.

Data:

The A-T Children's Project reviews Letters of Intent and proposals on a rolling basis.

Valor:

Provide awards primarily for translational and clinical research grants related to ataxia-telangiectasia. One and two-year projects are funded up to a maximum total direct cost of \$75,000 per year.
